

# Case Study: Gneeveguilla GAA Club

installed by LVP Renewables

## Overview

Gneeveguilla GAA Club sought to reduce its energy expenses and move toward a more sustainable future. With financial assistance from the SEAI grant, the club invested in a 14KW PV + 2P Solar Box & 500L Dual Coil system for free electricity generation and year-round hot water. This consisted of 33 solar panels and 2 hot water panels in November 2023. It has been just over a year since installation, so let's see how it's going!

**Date of Installation:** 08/11/2023

**Installation Size:** 14KW (33 Panels)

**Year 1 projections:** 12590 kWh's

**Payback period:** 3 ½ years

### Why LVP Renewables?

- Over 15 years in the industry!
- Clear, transparent paybacks delivered
- We handle the paperwork

LVP Renewables

## Proposal

- **Solar PV System:** Providing clean and efficient electricity, reducing reliance on the grid.
- **Thermodynamic Solar Hot Water System:** Ensuring 100% hot water 24/7, 365 days of the year. Lowering energy costs.
- **SEAI Grant Assistance:** Significantly reducing the upfront investment required for the project with the Non-Domestic Microgen Grant (NDMG).

## Point of Contact Testimony

"We are delighted with the savings we have seen since the installation. Our electricity bill decreased by €6241.28 euros in 12 months. We chose LVP because one of our club members was an installer for them. We spoke to Richard about our plans and the excellent information he provided helped us come to a decision to install the panels. The crew arrived on a Monday morning in Kerry and were a pleasure to deal with, along with Una in the office who had a detailed installation plan laid out for us. As a club, we could not speak highly enough of LVP and its workers for the service that they provided."

## Conclusion

Since the installation, Gneeveguilla GAA Club has experienced measurable financial and environmental benefits. The project has enabled the club to allocate more resources toward its sporting and community activities, reinforcing the positive impact of renewable energy in grassroots organizations.
